VERSATILE ALL-ROUNDER  
FOR HEAVILY USED FACILITIES

REKORTAN SES/SL

**polytan**

WE MAKE SPORT.

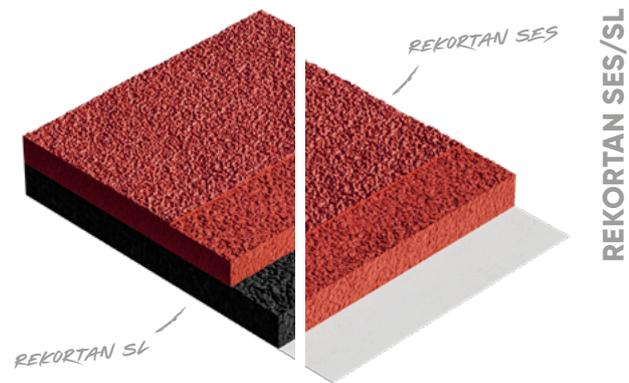

Water-permeable

# REKORTAN SES/SL

## ATHLETICS

Thanks to their structured surface, Polytan's water-permeable Rekortan SES and Rekortan SL are the perfect choice for heavily used sports facilities. Rekortan SES is especially suitable for use on running tracks and run-up tracks. The base layer consists of colour-coordinated EPDM granules to match the appearance of the structured wear coat. Rekortan SL is a three-layered surface with a middle layer that is colour-coordinated with the structured wear coat. It is primarily used in stress zones. Both synthetic surfaces are made of high-quality raw materials that ensure a durable surface and long-lasting attractive appearance.

## PROPERTIES

- Structural spray-coated surface with rubber granules and elastomer compound, spray-coated
- Optimally colour-coordinated base layer (Rekortan SES) or middle layer (Rekortan SL)
- Water-permeable

## AREAS OF USE

- Athletics stadiums
- Competitive running tracks
- School sports facilities
- Multi-purpose facilities
