WE MAKE SPORT.

Straight filaments

LIGATURF RS+ R

FOOTBALL, RUGBY, AMERICAN FOOTBALL

LigaTurf RS+ R is a highly robust synthetic turf system. Its rhombus-shaped, extra-thick fibres combined with Polytan ENTANGLEMENT Technology, provide long-lasting, optimum shock absorption and ideal ball-rolling and -bouncing characteristics. The width-to-thickness ratio of the fibres, which return to an upright position after use, makes LigaTurf RS+ R highly durable and long-lasting. Thanks to post-consumer recycled material in the filaments, the turf fulfils modern sustainability requirements (incl. certification in accordance with the ISCC's mass balance approach). FIFA Quality Pro certified, the LigaTurf RS+ R is a tried-and-tested product used at stadiums, professional training facilities and amateur clubs alike.

LIGATURF RS+ R

polytan

PROPERTIES

- Green Technology Inside: Filaments made from recycled raw materials
- Monofilament turf fibres with approx. 365 µm fibre thickness
- Exclusive Polytan CoolPlus function
- Innovative Polytan ENTANGLEMENT technology
- Exclusive Polytan 100 % PE formulation
- BiColour design
- 100 % PolyCoat PU wear coat

GREEN
technology

We act sustainably – from the development and selection of our raw materials to the production, installation, maintenance and recycling of our sports surfaces. Our products are designed with durability and efficient manufacturing in mind, using ecological materials and reliable processes.
