Straight filaments

# LIGATURF LEGEND PRO

**FOOTBALL, RUGBY, AMERICAN FOOTBALL**

The LigaTurf Legend Pro is a real powerhouse in terms of performance, making it the ideal solution for both professionals and aspirational amateurs alike: Thanks to the special multi-shape filament cross-section, LigaTurf Legend Pro offers improved fibre resilience. It therefore offers the perfect sport-specific performance, as exemplified by the turf's certification by different international standards. The newly designed cross-section also enables ball-rolling and playing conditions that are reminiscent of natural grass. Visually, the wider filament width provides good coverage and – in combination with a BiColour design – a fresh, natural appearance to the playing surface. The high wear resistance of the filaments has been proven by thorough laboratory tests and ensures the turf is sustainable. Thanks to the turf constructions adapted to the intended use and Polytan's system structure, athletes feel comfortable and safe on the turf at all times.

LIGATURF LEGEND PRO

## PROPERTIES

- Monofilament turf fibres with approx. 365 µm fibre thickness
- Exclusive Polytan 100 % PE formulation
- Multi-shape cross-section for optimal playing characteristics and appearance
- BiColour design
- 100 % PolyCoat PU wear coat

## AREAS OF USE

- Professional training facilities
- Amateur and professional clubs
- Sports colleges
